**Jessica:**

I am forwarding the attached message to you as I know that Councilman Boykins is very busy. I want to make sure that he gets my message. The City of Houston staff has been wonderful to work with. Although, we are having an issue with getting water free of charge from the City for the cleanup that we are in the process of doing to protect the Citizens of Houston that are near this abandoned industrial facility in the middle of a residential neighborhood.

I would appreciate it very much if the Councilman could insure that the City will authorize the use of the fire hydrant and water free of charge. Additionally, there may be other items that we request of the City that we will not be able to address as part of our cleanup actions. (ie. disposal of illegally dumped municipal waste along Wayland Street.).

Thanks

**Gary Moore**

Councilman Boykins

The EPA has started it's actions at CES and would like to see if you can get the City to waive costs it would normally require (ie. Water usage). In order to be successful for the sake of the residents it is imperative that EPA, TCEQ, and the City work together both technically and financially.

I would appreciate any support you can provide to in helping us get non-cost water or other in kind services.

Thanks
